About us

TechEniac, founded in 2017, is a team of Design Freaks and Code Gods. We work on innovative ideas and create memorable experiences. We work on ideas to make lives simpler and adore nature. We, at Techeniac, do magic by rethinking-recreating- reimaging obvious things around us. With rich amalgamation of function, technology, style and strategy we deliver best solution to our beloved clients. TechEniac is a result oriented Design services provider, offering solutions at competitive costs with unique execution model. TechEniac empowers clients to achieve competitive advantage through great designs and flawless implementation.

- Product Owners often receive little guidances
- It's difficult to predict what users actually want
- Development problems may not be identified or remedied until it's too lates
- It gets more expensive to pivot as time goes on

What We Offer

We provide services that will retain the attention of the target audience andincrease the number of customers. We'll provide services to make development easier by only working with the best.

Requirement Analysis

Custom Web App Development

JavaScript Development

SaaS Development

Dedicated Teams

DevOps Engineering

White Label Product

IT Staff Augmentation

Tech-Stack

We use the newest technologies to build custom applications.

Front-end frameworks :

Reactjs, Nextjs, Tailwind css ,storybook js, MUI, Ant Design, playbook and TypeScript,

Back-end Development :

Nodejs, TypeScript, NestJs, Jestjs, AWS, Serverless, S3 bucket, Socket.io and Google Cloud/Firebase

• Database : Mongodb, MySQL, Postgresql

• 3rd party API integration: Stripe

• AI/ML : Custom chatbot development. data modeling.

Closechat.ai

The AI Sales Chatbot That Sells More Products On Autopilot 24/7

In this project we develop a website and a shopify app. In the website you need to do registration and after that you install a closechat.ai app in shopify store that help help to measure the all orders from your store and track your store performance based on your order. It will also create a chatbot on your shopify website and through which customer can ask any information of store like give best product from your store etc. chatbot can also give order information of customer.

Client: Italy

Industry: E-commerce Store Owners, Small to Medium E-commerce

Enterprises SMEs

Target Audience : E-commerce Solutions/Customer Interaction

Platforms

Tech Stack -React , Next ,MUI , Node.js, Typescript

URL : https://app.closechat.ai/

Key highlights

Bringing Statistics and Teaching Together

RGuroo serves as a multifaceted platform, boasting a versatile dashboard designed to oversee the comprehensive management of students, teachers, and an array of statistical resources. Seamlessly embedded within its framework is an email marketing module, empowering user engagement and communication. This platform further integrates a headless WordPress structure via GraphQL, presenting users with a cohesive and accessible blog interface alongside its other functionalities.

Client: USA

Industry: Education Technology (EdTech)

Target Audience : Educational Institutions, Administrators

Tech Stack –Tech Stack - React, MUI, Typescript, Java, Oracle, Wordpress,

GraphQL, AWS EC2, RDS

URL : https://rguroo.com/

Key highlights

VetApp2Date

Revolutionizing Abstract Management: Efficiency Redefined!

VetApp2Date involves API and Admin panel development utilizing a microservices architecture and MUI theme. Users access and manage abstracts through RevenueCat subscriptions, while admin control covers abstract creation and modification, facilitated by Keycloak services and RabbitMQ communication. The project's entire management relies on Docker.

**Client**: Italy

Industry: Software as a Service (SaaS)

Target Audience :App User

Tech Stack -NestJS, MUI, Typescript, NodeJS, Keycloak, PostgreSQL,

Firebase, GCP

URL : https://vetapp2date-duckma-dev.web.app

Key highlights

Execution Model

Fixed Cost Project

- Predefined set of requirements
- Requirement Analysis, Query Documentation and Clarification
- Fixing Scope of work
- Proposal having detailed Feature list, Fixed time and cost estimation
- Fixed Milestone wise Payment   Schedule
- UAT and Warranty Period

Dedicated Monthly Hiring

- 160+ hours of dedicated support
- Scope of work is not defined, chances of changes gradually
- Identify skillset and experience level of Resources
- Present CVs of shortlisted candidates
- Agile Methodology, Sprint Planning, Scrum Meetings

Time & Material Basis Hiring

- Purchase bucket of hours per month which can be used in bits and parts within same month
- Minimum 80 hours
- Charge on hourly basis
- Track and Record time and task details
- Response time – 1/2 days

How Do We Work?

- ## Agile Development (Scrum)

This system for software development began to gain traction in the late 1990s, but the term itself wasn't introduced until 2001 with the Agile Manifesto, which outlined the following core values:m O Individuals & Interactions vs Processes & Tools
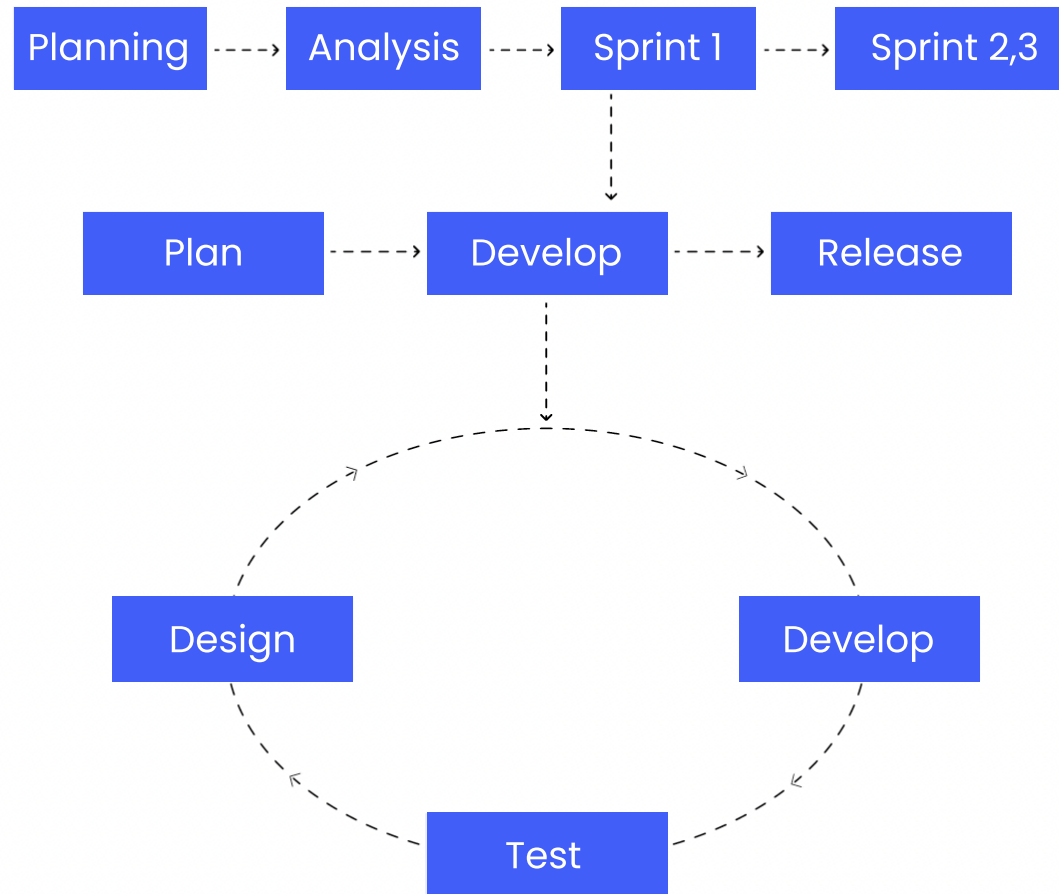

- Working Software vs Comprehensive Documentation
- Customer Collaboration vs Contract Negotiationm
- Responding to Change vs Following a Plan
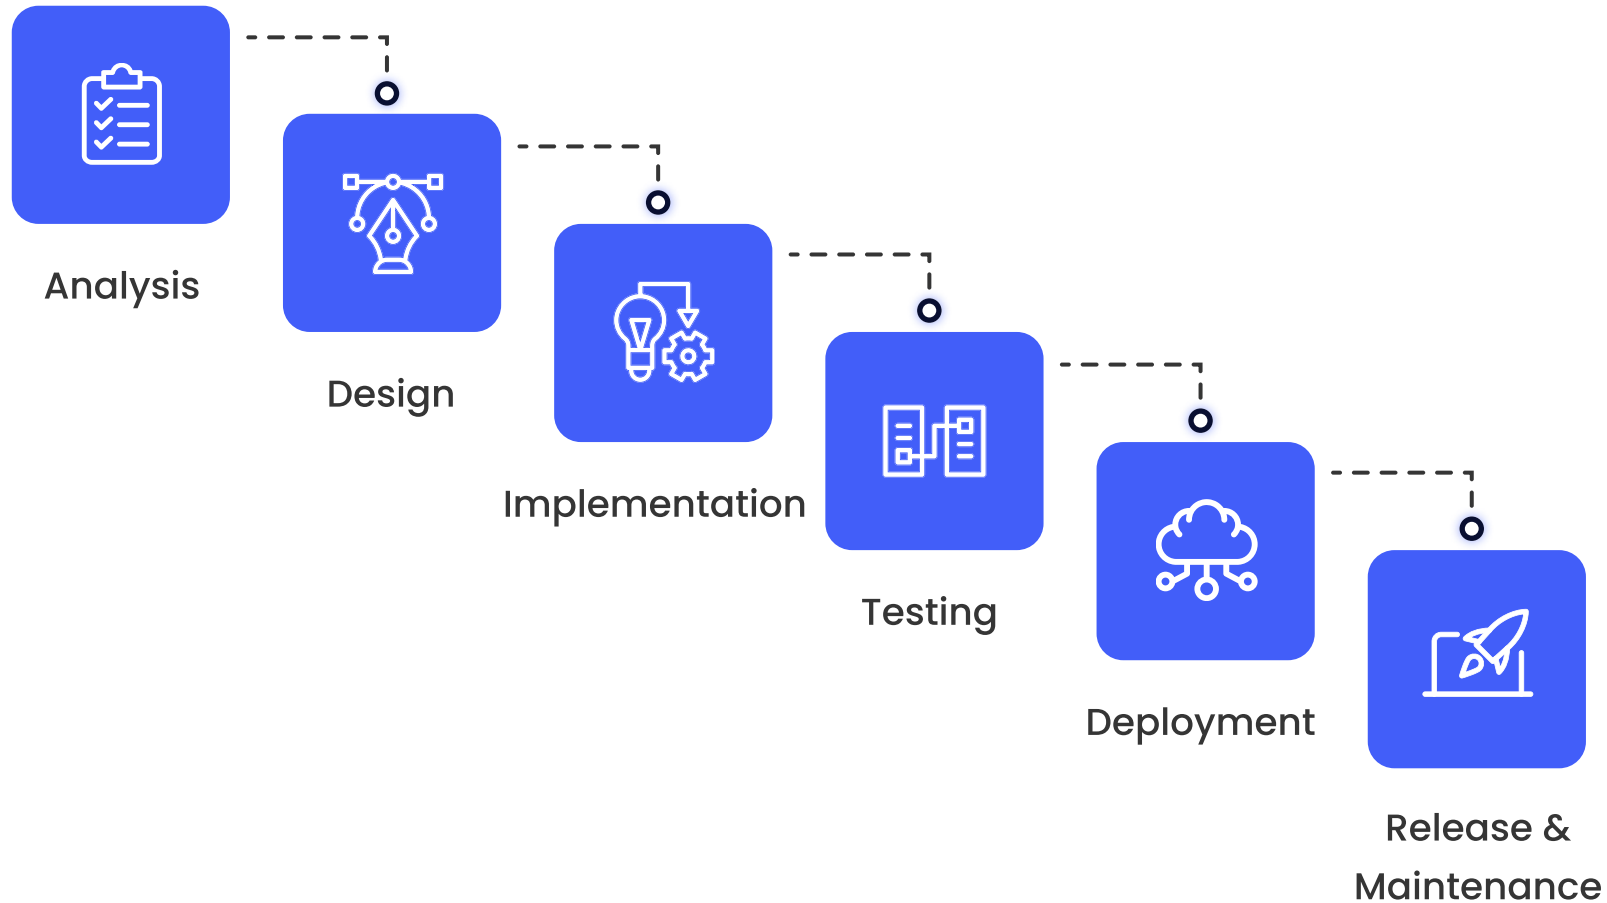

- ## Waterfall Development

Heralding from the industrial era, where building products often went hand-in-hand with manufacturing and construction, the Waterfall Methodology is a step-by-step process that requires completing one step before moving on to the next.

Often, it's accompanied by extensive paperwork, contract negotiations, and bureaucratic processes. But the true downside is that products are often tested towards the end of the process - after the majority of your time, money, and energy have been invested, and often right before you expect to ship.

Agile Development

Planning - - -> Analysis - - -> Sprint 1 - - -> Sprint 2,3

Plan - - -> Develop - - -> Release
